

HSM-38/3S
HEATED SHELF MERCHANDISER

- Three-shelf merchandiser incorporates thermal kinetic glass technology to provide three evenly heated display surfaces.
- Packaged foods are held at safe temperatures to offer quality holding on each of the three independently controlled shelves.
- Low wattage fluorescent lighting at the top of each shelf enhances the display while the glass shelves provide the low power usage of kinetic energy.
- Vertical display maximizes packaged product capacity in a small linear footprint while the glass side panels offer greater product visibility from both sides of each illuminated shelf.

The multi-shelf merchandiser includes heavy-duty, non-magnetic stainless steel construction throughout. Each of the three (3) shelves are controlled by one (1) adjustable thermostat with a range of 0 to 10, and includes one (1) heat-on indicator light. The controls are protected by a sliding panel on the front of the merchandiser. Two (2) shelves are angled at 8° for visibility, and include one (1) warm-light fluorescent above each shelf. The bottom shelf is flat. Front mounted heat-guards provide customer protection. Solar cool, bronze side glass reflects heat back into the product area and mirrors the display to enhance the merchandising effect. Stainless steel front panel and black laminate end panels are standard.

MODEL HSM-38/3S: Three-tier, self-service merchandiser, 38" (965mm) width

ADDITIONAL FEATURES & OPTIONS

- Front Panel
 - ➔ Specify color choice:
